

CAMILLO FAMILY OFFICE

Camillo Family Office – Houston, TX

Project Introduction:

For the Camillo Family Office headquarters, our team delivered a full turnkey solution. From analyzing floorplans and understanding corporate hierarchy, to defining style preferences and functional requirements, every step of the process was managed in-house.

Scope:

- Executive spaces: Presidential Office (Sessanta collection)
- VP & Director Offices: Dieci 2.0 system
- Meeting Rooms: Block 2.0 tables
- Workstations: Custom layouts tailored to teams
- Reception: Bespoke designs with modern finishes

By combining technical planning with curated design concepts, we created spaces that reflect both the prestige and the daily functionality of the Camillo Family Office.

Alma Flexibe Collection

Two 120-seat auditoriums inside the **Charlemagne building**, the headquarters of the European Commission in Brussels, designed for daily use in official EU meetings.

A custom-built 173-seat curved auditorium at the **heart of EU decision-making**, combining bespoke seating with strict acoustic and accessibility standards.

The largest hall of the Charlemagne building – a 440-seat venue hosting **international EU conferences and high-level summits**, fully equipped with advanced technology and translation systems.

WORKSTATIONS & SYSTEMS

Openwall is a modular partition system that transforms workplaces with transparency, flexibility, and acoustic performance. Designed to integrate seamlessly with workstations and executive environments, it offers single or double-glass panels, sliding or hinged doors, and endless finish combinations. Openwall delivers both openness and privacy, making it ideal for modern offices that need adaptable layouts without sacrificing design.

Neo Collection

In partnership with MoVe Architects, we transformed Imperial Brands' Bucharest headquarters into a modern open-plan workplace. The project combined ergonomics, acoustic comfort, and biophilic design with vibrant meeting and collaboration areas. Durable finishes, integrated technology, and sustainable production ensured a workspace that reflects the company's identity while enhancing daily performance.

PARTITIONS

Partitions

The Double Glass Partition system offers maximum acoustic insulation with a sleek, transparent design. Its dual-glass construction ensures privacy and soundproofing, while maintaining brightness and openness across spaces. With flexible door options, refined finishes, and easy installation, it is the solution of choice for offices that demand both silence and style.

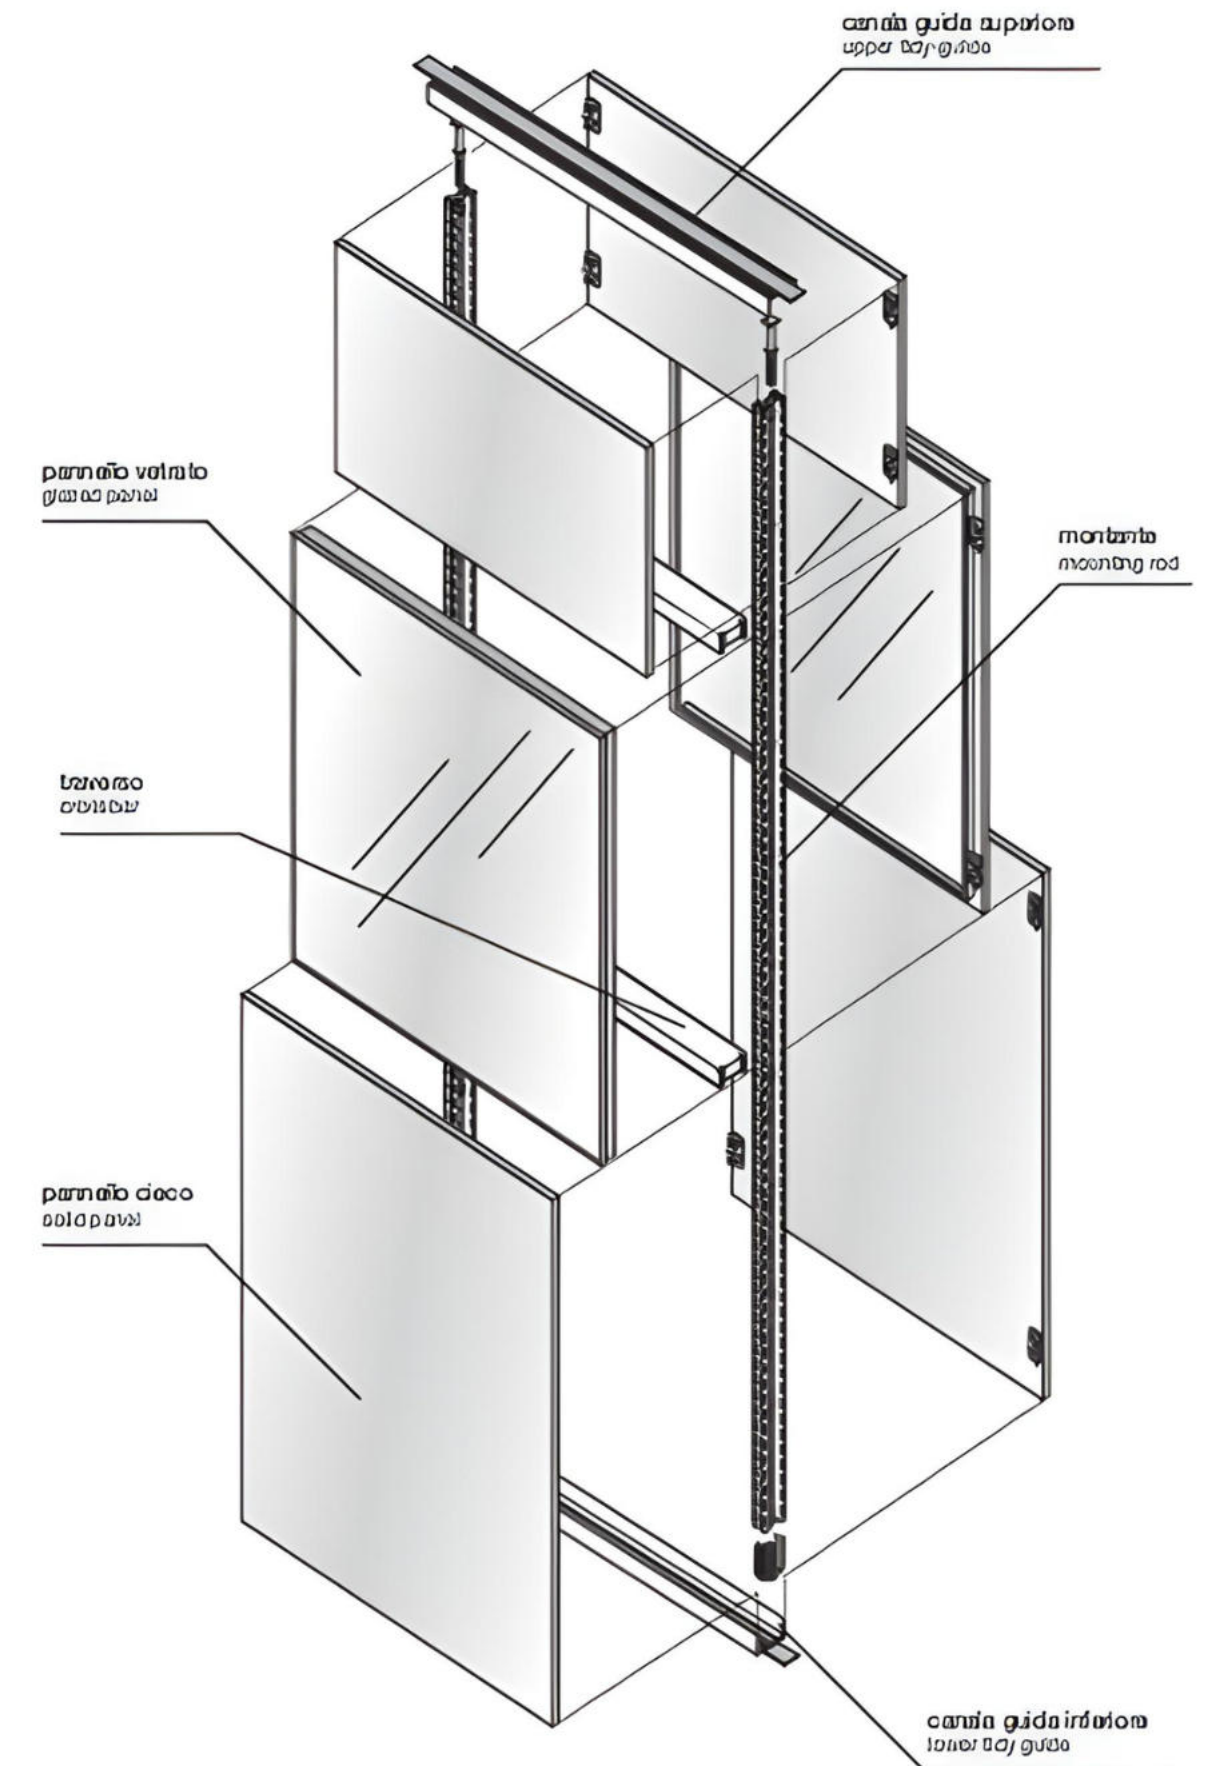

Double Glass Partition

Profwall is a fully modular wall system that combines architectural elegance with functional performance. Offering solid, glazed, and equipped modules, it allows limitless customization to divide and organize space while integrating storage, technology, and acoustic solutions. Profwall transforms interiors into flexible, high-end environments that adapt to evolving workplace needs.
